SUMMARY

Full Stack Developer building full stack web applications with JavaScript, React, Python, Firebase, and REST APIs. Develops interactive user interfaces, connects frontend and backend services, and applies AI-powered application development to solve real product problems. Brings computer science and business systems training to practical software delivery and hackathon projects.

PROJECTS

EchoLedger – AI Decision Verification Platform | Team Lead & Full Stack Developer

Tech Stack: React, Vite, Tailwind CSS, Firebase Authentication, Firestore, Framer Motion

- Led the development and technical planning of the project.
- Built the frontend, integrated Firebase Authentication and Firestore.
- Designed a responsive UI and deployed the application.

AirMap – AI-Powered Air Quality Monitoring System | Team Lead & Full Stack Developer

Tech Stack: React, JavaScript, Firebase

- Led frontend development and coordinated feature implementation.
- Built responsive dashboards and interactive AQI visualizations.
- Integrated frontend with backend services.

CareerPulse AI – AI Career Guidance Platform | Team Lead & Full Stack Developer

Tech Stack: HTML, CSS, JavaScript

- Led project planning and frontend development.
- Built responsive interfaces with an intuitive user experience.
- Developed interactive career guidance features.

EDUCATION

B.Tech – Computer Science & Business Systems (CSBS) **2025 – Present**

Madhav Institute of Technology & Science
(MITS), Gwalior

Senior Secondary (Class XII – CBSE) **2024-2025**

Army Public School, Gwalior

KEY SKILLS

Core Areas

- Full Stack Web Development
- UI/UX Design
- AI-Powered Application Development
- Software Development
- API Integration

Programming Languages

- Java
- JavaScript (ES6+)
- Python
- C++
- HTML5
- CSS3

Frontend and Database

- React.js
- Vite
- Tailwind CSS
- Framer Motion
- Firebase Authentication
- Firebase Firestore
- REST APIs
- MySQL (Basics)

Tools & Platforms

- Git
- Postman
- Figma
- Netlify
- Render
- OpenAI Codex
- Cursor AI
